

ABSTRACT OF THE DISCLOSURE

1
2 A player selects the number of hands that the player
3 wishes to play. A plurality of initial partial hands are
4 displayed to the player. Each initial partial hand has the
5 same cards with the cards displayed face up to the player.
6 Each hand is then completed as a stud poker final hand by
7 dealing the additional cards from either the original single
8 deck of cards (less the initially dealt cards) or from a
9 plurality of partial depleted decks of playing cards, each
10 depleted deck of playing cards comprising a full deck less the
11 cards dealt as the initial partial hand. The player wins or
12 loses depending on the poker hand ranking of each final hand.
13 The amount won by the player is based on the poker hand
14 ranking of each final hand and the amount wagered by the
15 player according to a pay table.
